

iM TIME COMMAND

GLOBAL ENTREPRENEUR SUITE — OFFICIAL USER GUIDE

Version 4.0 | Live Suite: <https://im-time-command.vercel.app>

GitHub Repository: github.com/ovrgapparel-dotcom/im-time-command

Executive Suite Description

iM Time Command is an all-in-one Global Entrepreneur Suite designed to streamline cross-border time zone management, strategic calendar planning, client and collaborator relationship velocity, and business growth tracking into a single unified platform. Featuring a real-time Partner Clock Strip with contact method shortcuts (Call, WhatsApp, Email, Google Meet, Messenger), a 2-column drag-and-drop Agenda Planner, an Actionable Milestone Journey with XP gamification across 4 core business growth stages, an AI Smart Reply & Gmail inbox integration, and a dedicated Calendar & Booking Hub, iM Time Command empowers international entrepreneurs, agency owners, and remote teams to execute with precision across time zones, maximize meeting efficiency, and track focus analytics without subscription complexity.

1. Core Modules & Architecture

- **Agenda Planner & Grid:** Drag-and-drop calendar planner supporting Day and Week views, drag-to-duplicate (Ctrl/# +drag), bottom-edge time resizing, and instant .ics calendar exports.
- **Global Time Command & Partner Strip:** Real-time partner clock strip displaying live local times, working hours status (Available, Off Hours, Weekend), and preferred contact methods.
- **Collaborator & Client Directory:** Searchable directory supporting unlimited contacts with CSV & VCF (Phone Contacts) file import/export and 1-click meeting scheduling.
- **Planner Metrics & Performance Analytics:** Live KPI cards and interactive charts tracking total meeting hours, meeting density by weekday, warm-up prep buffer, cool-down buffer time, and focus balance.
- **Actionable Milestone Journey & Growth Tracker:** Gamified entrepreneur growth engine featuring 4 stages, 12 actionable sub-tasks with XP rewards (+15 to +50 XP), progress tracking, and custom task creation.
- **Smart Reply Engine & Gmail Inbox:** 10 platform messaging shortcuts, contextual AI reply generators (Formal, Friendly, Direct), and full Google OAuth 2.0 Gmail inbox integration.

2. Step-by-Step Feature Walkthrough

Step 1: Setting Up Your Profile & Primary Time Zone

Open Settings (gear icon in header) to set your name, business handle, primary time zone, and preferred notification lead time (e.g. 15 mins before meetings).

Step 2: Managing Collaborators & Importing Phone Contacts

Click "Directory" or "Add Contact" in the clock strip. Add contacts manually or upload any .csv or phone contacts .vcf file. Search contacts by city, country, or name.

Step 3: Scheduling Meetings & Calculating Time Overlaps

Click "Schedule Meeting" on any contact card in the Directory or Partner Availability sidebar. The Event Modal will auto-prefill the contact, title, and calculate their local time offset.

Step 4: Optimizing Schedule Buffers & Focus Analytics

Scroll to the Planner Metrics panel under the agenda grid. Review your Warm-Up prep and Cool-Down recovery buffer averages to ensure healthy meeting pace without burnout.

Step 5: Executing the Actionable Milestone Journey

Navigate to the Growth tab. Complete actionable tasks under Offer Validation, Client Acquisition, Systems & SOPs, and Scaling. Check boxes to earn XP and level up.

Step 6: Generating Google Meet & Booking Links

Switch to the Cal Hub tab to store master Calendly links or generate instant Google Calendar events with pre-configured Google Meet video links.

3. Supported Contact Method Shortcuts

Contact Method	URL Protocol / Format	Action
Phone / Call	tel:+1234567890	Initiates phone dialer
WhatsApp	https://wa.me/1234567890	Opens direct WhatsApp chat
